Steps in Classification with WebDewey

1. Determine the subject
2. Determine the discipline
 - Search Relative Index to see disciplines in which a subject is treated
 - Use Main Classes, summaries
3. Click on number in search results or from Main Classes to go to class record
4. Verify number - check notes on coverage, usage, add instructions, local catalog, etc.

741.5 vs. 741.56 Comic books, graphic novels, fotonovelas vs. Cartoons, caricatures, comic strips

[741.5 vs. 741.56](#) Comic books, graphic novels, fotonovelas vs. Cartoons, caricatures, comic strips

[History](#)

Notes

Use [741.5](#) and [741.59](#) for comic books, graphic novels, fotonovelas, e.g., Astérix (by Uderzo and Goscinny), Astro Boy (by Osamu Tezuka), Contract with God and Other Tenement Stories (by Will Eisner), Fantastic Four, Nikopol Trilogy (by Enki Bilal), Strangers in Paradise (by Terry Moore), Tintin (by Hergé), Wonder Woman. These are multi-panel works written to be read in relatively long segments, like short stories or novels. If they were originally published in parts, the parts are likely to have been issued monthly or less frequently (occasionally weekly or biweekly as part of serial anthologies), not daily.

Use [741.56](#) and [741.569](#) for cartoons, caricatures, comic strips, e.g., caricatures by Max Beerbohm, Al Hirschfeld, and David Levine; New Yorker and Punch cartoons; cartoons by Michael Leunig; Andy Capp (by Reg Smythe), Doonesbury (by G. B. Trudeau), The Far Side (by Gary Larson), For Better or for Worse (by Lynn Franks Johnston), Garfield (by Jim Davis), Peanuts (by Charles M. Schulz). These were written to be read in brief segments, like jokes or anecdotes. They have a single panel, or a few panels issued daily or weekly online or in a newspaper; consequently, they have an anecdotal quality even when the same characters appear in many segments brought together in collected works.

Use [741.56](#) and [741.569](#) for works originally published as comic strips, unless the same main characters also appear frequently in comic books, graphic novels, fotonovelas. Avoid separating works about the same characters between [741.569](#) and [741.59](#); use the number for the form in which the characters most commonly appear, regardless of whether the content of the work in hand was originally issued as comic strips or comic books, e.g., [741.56973](#) for works about Dick Tracy (most commonly issued as comic strips), but [741.5973](#) for works about Spider-Man or Star Wars (most commonly issued as comic books). If in doubt, prefer [741.59](#).

Use [741.5](#) and [741.59](#) for comprehensive works on both kinds of graphic works. Use [741.59](#) for graphic artists and writers who are equally well known for doing both kinds of graphic works.

If in doubt, prefer [741.5](#) and [741.59](#).

Use [741.51](#) Techniques, procedures, apparatus, equipment, materials and [741.53](#) Special aspects of comic books, graphic novels, fotonovelas, cartoons, caricatures, comic strips for both kinds of graphic works.

History

Notes

The following notation is never used alone, but may be used as required with any regular schedule number, e.g., workbooks ([T1--076](#) in this table) in arithmetic ([513](#)): 513.076. When adding to a number from the schedules, always insert a decimal point between the third and fourth digits of the complete number. Unless other instructions are given, the terminal zeros in a main class or division number should be dropped before adding a standard subdivisions, e.g., journals ([T1--05](#) in this table) in mathematics ([510](#) minus the final zero): 510.5. (Full instructions on the use of standard subdivisions are found in the Introduction to the Dewey Decimal Classification)

Standard subdivisions should be added only when the work in hand covers the whole, or approximately the whole, subject of the number in the schedules

When standard subdivision notation from Table 1 is listed in Tables 2 through 6 and in the schedules, all of the notation's notes and subdivisions as given in this table are applicable unless other instructions are given. Other Table 1 notation that is not listed in the schedules may also be used. For example, the fact that [610.7](#) is listed, but not 610.8 or the subdivisions of [610.7](#), does not exclude the use of 610.8 or [610.71](#)

Do not add one standard subdivision to another standard subdivision unless specifically instructed. Standard subdivisions may be added to special notation listed in the regular standard subdivision sequence, to subdivisions of [T1--04](#) Special topics that are specifically listed in the schedules, and to displaced standard subdivisions wherever they appear. Numbers in the schedules that look as though they were built with notation from this table but are outside the regular sequence of standard subdivisions are not considered "standard" subdivisions. Hence notation from Table 1 may be added to such schedule numbers

Never use more than one zero in applying a standard subdivision unless instructed to do so. If more than one zero is needed, the number of zeros is always indicated in the schedules. If the 0 subdivisions of a number in a schedule are used for special purposes, use notation 001-009 for standard subdivisions; if the 00 subdivisions also are used for special purposes, use notation 0001-0009 for standard subdivisions

Unless other instructions are given, observe the following table of preference, e.g., communication in education and research [T1--07](#) (not [T1--014](#)):
