

CSS3 WORKSHOP

oclc.org 2011

Christopher Schmitt
<http://twitter.com/@teleject>

A vibrant, multi-colored portrait of a man's face and hair, rendered in shades of blue, red, and pink. He wears thin-framed glasses and has a slight smile. The background is a solid red.

WHO AM I?

- Web design specialist, trainer
- Organize online & offline Web design conferences
- Author of *Designing CSS Web Pages*
- Author of *CSS Cookbook, 3rd Edition*
- <http://ChristopherSchmitt.com>

TODAY'S **AGENDA**

- **What is CSS3?**
- **Explore new CSS3 selectors, properties**
 - **(and some other things, too)**
- **How to make them cross-browser, when possible**
- **Tinker with CSS3 examples on our own**
- **Look at resources to help include CSS3 into your designs**

WHAT IS CSS3?

5 Candidate Recommendation

WHERE IS CSS3 COMING?

- The specification is divided into different chunks, modules
 - <http://www.w3.org/Style/CSS/current-work>
 - Transformations
 - Animations
 - Media Queries
 - and so on, and so on...
 - at a glacial pace ever towards yesterday

WHERE IS CSS3 COMING?

- **The specification is divided into different chunks, modules**
 - <http://www.w3.org/Style/CSS/current-work>
- **The specification is being written by W3C**
 - <http://www.w3.org/Style/CSS/>

WHERE IS CSS3 COMING?

- **The specification is divided into different chunks, modules**
 - <http://www.w3.org/Style/CSS/current-work>
- **The specification is being written by W3C**
 - <http://www.w3.org/Style/CSS/>
- **Browser vendors (like Firefox, Safari, and Opera) are implementing their own versions of these unfinished standards**
 - IE9 is “bringing the power of PC hardware and Windows”

CSS3 . Info / selectors test / CSS Selectors testsuite

CSS Selectors

Is your browser compatible?

<http://blogs.msdn.com/ie/archive/2009/11/18/an-early-look-at-ie9-for-developers.aspx>

selector it is marked as such. You can click on each CSS selector to see the results, including a small example and explanation for each of tests.

Because it is technically not possible to simulate certain user interactions the test is limited to CSS selectors that are not dependent on user interactions. So this test-suite does not include tests for the following selectors: :hover, :active, :focus and :selection.

From the 43 selectors 41 have passed, 1 are buggy and 1 are unsupported (Passed 574 out of 578 tests)

EXPLORING CSS3 (AND STUFF)

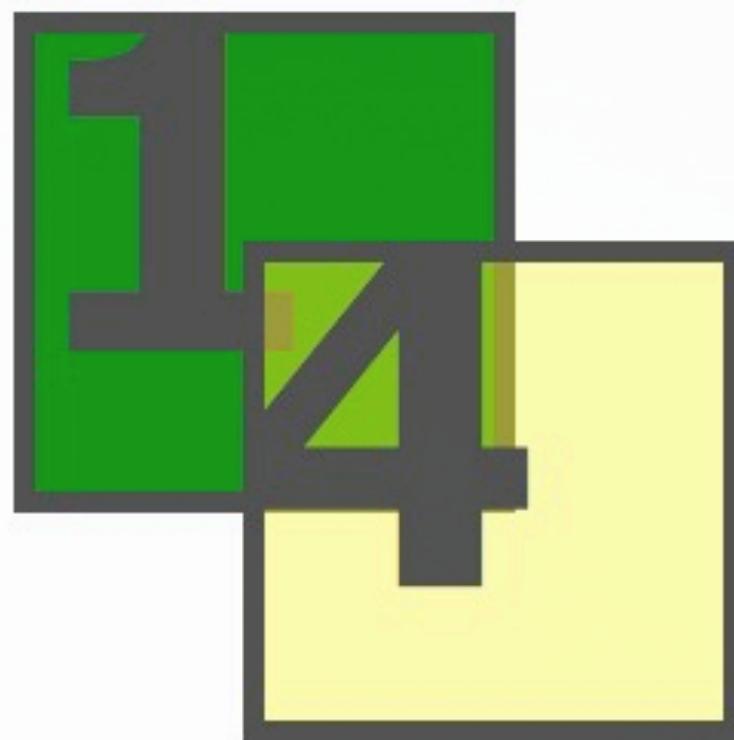

COLOR

COLOR: OPACITY ON BACKGROUND COLORS (RGBA)

OPACITY

```
#number4 {  
background-color: rgba(255, 255, 0, .4);  
}
```

OPACITY

```
#number4 {  
  background-color: rgb(255, 255, 0);  
  background-color: rgba(255, 255, 0, .4);  
}
```

LESSONS LEARNED

- **Firefox 3+, Opera 10+, and Safari support RGBA**
- **Requires another background-color property for cross-browser support.**
- **IE Support?**

OPACITY IN IE

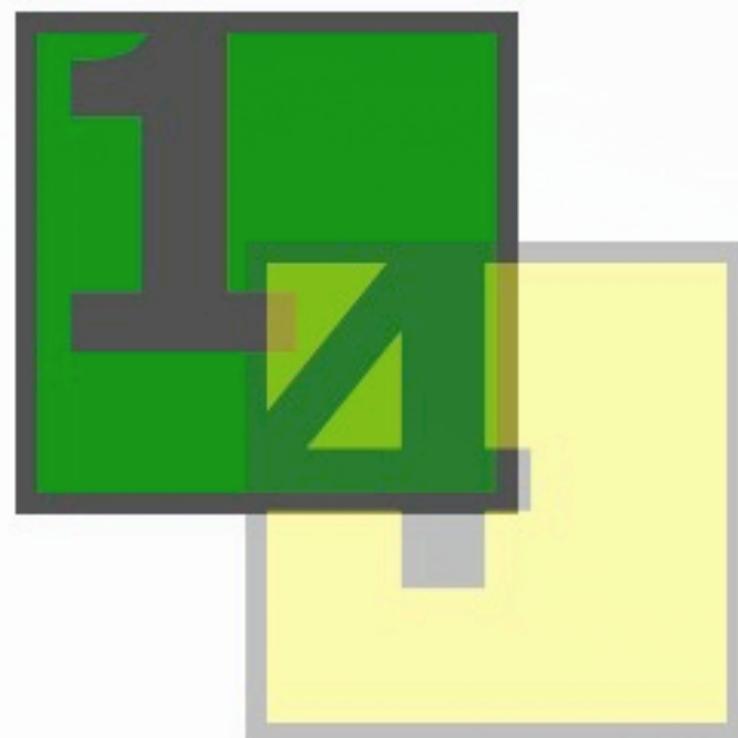

```
#number4 {  
background-color: transparent;  
filter:progid:DXImageTransform.Microsoft.gradient(  
startColorstr=#66FFFF00,  
endColorstr=#66FFFF00  
);  
}
```

OPACITY IN IE

- First step is to convert the RGB value of the color to hexadecimal. In this example, `rgb(255,255,0)` converts to `#FFFF00`.
- Next, convert the alpha transparency value to hexadecimal string . In this example, the value is 66.
 - E.g., alpha value of .3 equals 4D in hexadecimal values
- Then assemble the hexadecimal value for transparency and the color together in one string, starting with the transparency: `#66FFFF00`.

OPACITY ON ELEMENTS

OPACITY ON ELEMENTS

```
#number4 {  
  opacity: .4; /* .4 = 40% transparency */  
  filter: alpha(opacity=40); /* 40 = 40%  
  transparency */  
}
```

LESSONS LEARNED

- Supported in Firefox 1.5+, Opera 9+, Safari 1.2+ and Chrome.
- IE 5.5+ requires the use of its own alpha filter in order for the effect to be cross-browser.
- A drawback to using the opacity filter is that the value is inherited:
 - If a parent element is set to be 10% transparent, the child elements' transparency is also going to be 10%.
 - Watch out for legibility issues within the Web page.

FONT FILE SUPPORT

	.ttf	.otf	.eot
Safari 3.1+	Y	Y	
Opera 10+	Y	Y	
Firefox 3.5+	Y	Y	
IE4+			Y

@FONT-FACE

```
@font-face {  
  font-family: 'MyFontFamily';  
  src: url('myfont-webfont.eot'); /* IE9 Compat Modes */  
  src: url('myfont-webfont.eot?iefix') format('eot'), /* IE6-IE8 */  
  url('myfont-webfont.woff') format('woff'), /* Modern Browsers */  
  url('myfont-webfont.ttf') format('truetype'), /* Safari, Android,  
iOS */  
  url('myfont-webfont.svg#svgFontName') format('svg'); /* Legacy  
iOS */  
}  
h1 {  
  font-family: "MyFontFamily", Verdana, sans-serif;  
}
```

<http://paulirish.com/2009/bulletproof-font-face-implementation-syntax/>

LESSONS LEARNED

- Getting @font-face to work is a little tough.
 - Use <http://fontsquirrel.com> for pre-made kits, @font-face generator
- Chrome will have support in next build. (It's in the betas.) Use SVG,
- Don't feel like bothering with all that hassle?
 - Use font services like typekit.com for 100s of licensed fonts.
 - Use commercially free fonts (see <http://fontsquirrel.com>)

LESSONS LEARNED

- Font files are LARGE
 - gzip them, if you use them:
<http://articles.sitepoint.com/article/web-site-optimization-steps/2>
- New font file format: WOFF:
<http://hacks.mozilla.org/2009/10/woff/>
 - Font files are already compressed and supports meta information telling where the font came from. (Vendors happy.)
 - It's supported FF3.6

OH? YOU WANT “ITALICS”?

```
@font-face {  
    font-family: 'MyFontFamilyItalic';  
    src: url('myfont-webfont-italic.eot'); /* IE9 Compat Modes */  
    src: url('myfont-webfont-italic.eot?iefix') format('eot'), /* IE6-IE8 */  
        url('myfont-webfont-italic.woff') format('woff'), /* Modern Browsers */  
        url('myfont-webfont-italic.ttf') format('truetype'), /* Safari, Android, iOS */  
        url('myfont-webfont-italic.svg#svgFontName') format('svg'); /* Legacy iOS */  
}  
}
```

<http://www.fontspring.com/blog/further-hardening-of-the-bulletproof-syntax>

TEXT-SHADOW

A Good Sleepy is a Good Thing Indeed

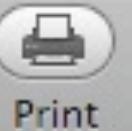

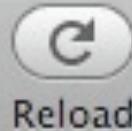

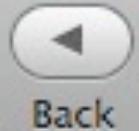

I had to wake up early for the dentist appointment this morning. Why is it that on the day I have to wake up really early it is with a good sleep? I had the blankets right where they were the most comfortable, too.

If that ever happens, our society should allow you to tell the other person you were late because you realized you in the middle of a "good sleepy". It's the positive version of "I was in a car accident."

Try the phrase out, see how it works and report back to me.

TEXT-SHADOW

```
h1 {  
    font-size: 2.5em;  
    font-family: Myriad, Helvetica, Arial, sans-serif;  
    width: 66.6%;  
text-shadow: yellow .15em .15em .15em;  
    margin: 0 0 0.1em 0;  
}

font-weight: bold;  
text-transform: uppercase;  
text-shadow: 0px 0px 5px rgba(0,0,0,.8);  
}
```

LESSONS LEARNED

- Works in FF 3.1+ and Safari 4+.
- Image is scaled, if text is also scaled.
- Other values besides “stretch” are “repeat” (tiles the image); “round”, which tiles and filled it with whole images; and “space”, which is like “round” except it leaves empty space

BORDER-RADIUS

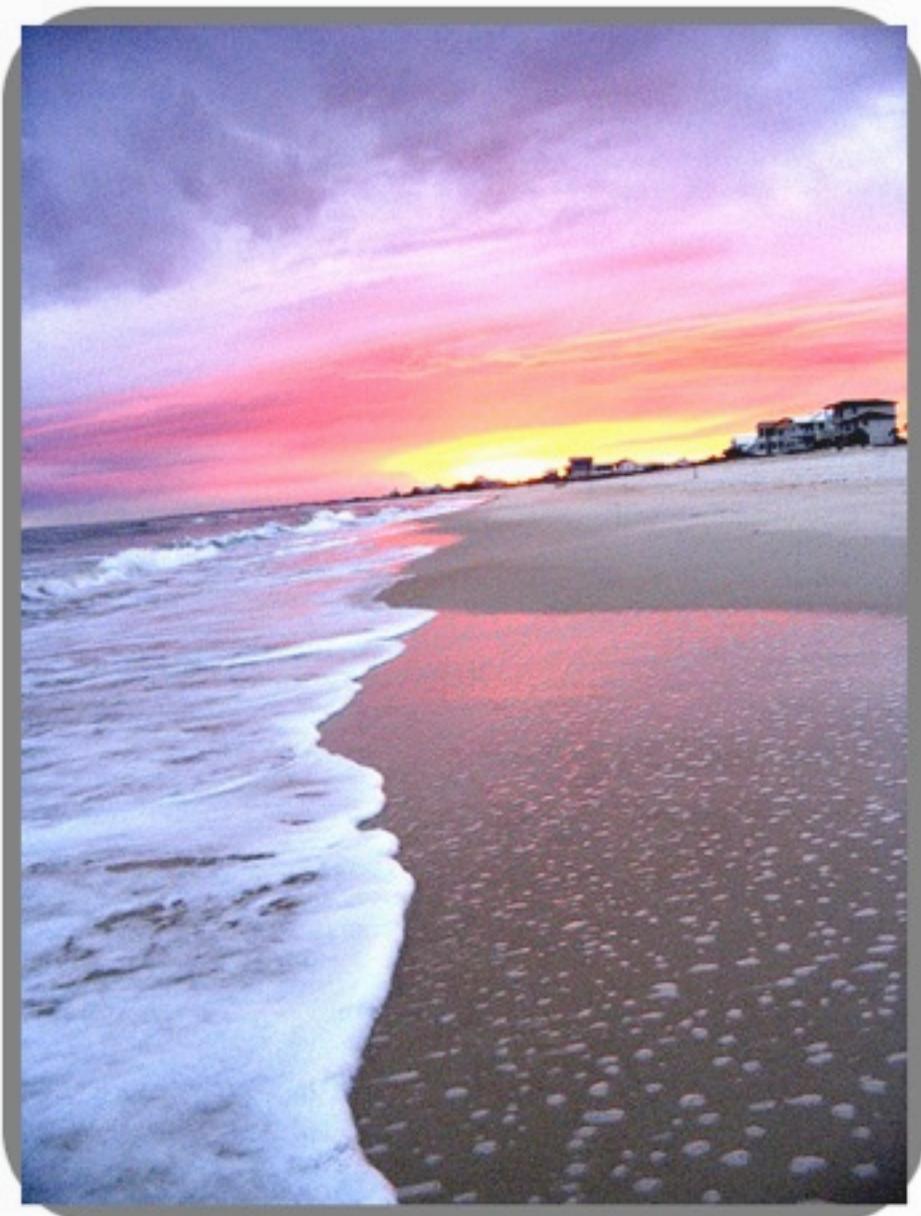

HTML Validation

CSS Cookbook

Christopher Schmitt : Designer,...

Technology Books, Tech Confer...

BORDER-RADIUS

```
div {  
background-image: url(beach.jpg);  
width: 375px;  
height: 500px;  
border: 8px solid #666;  
border-radius: 40px;  
-moz-border-radius: 40px;  
-webkit-border-radius: 40px;  
}
```

BORDER-RADIUS

CSS3	Firefox	WebKit
border-radius	-moz-border-radius	-webkit-border-radius
border-top-left-radius	-moz-border-radius-topleft	-webkit-border-top-left-radius
border-top-right-radius	-moz-border-radius-topright	-webkit-border-top-right-radius
border-bottom-right-radius	-moz-border-radius-bottomright	-webkit-border-bottom-right-radius
border-bottom-left-radius	-moz-border-radius-bottomleft	-webkit-border-bottom-left-radius

LESSONS LEARNED

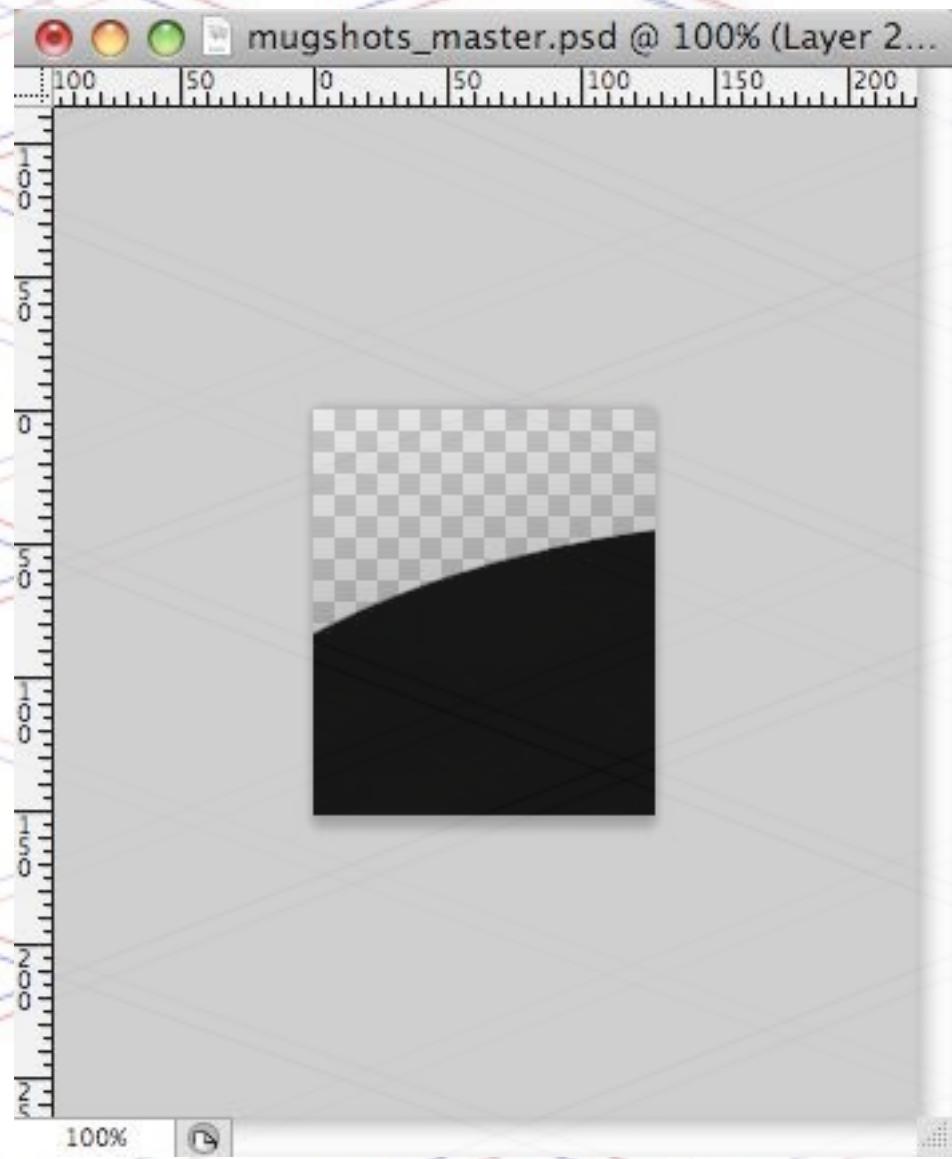

- Radius is half the distance of the diameter. (Stay in school, kids!)
- Radius border can be applied to one, two, three or all corners.
- The higher the value for the radius, the more rounded the corner will be.
- If borders on an inline image (IMG element) are rather large, borders are shown behind the image (see previous screenshot).
- Workaround is to either keep border-radius value small or place image in background.

EFFECTS

IMAGE MASKS

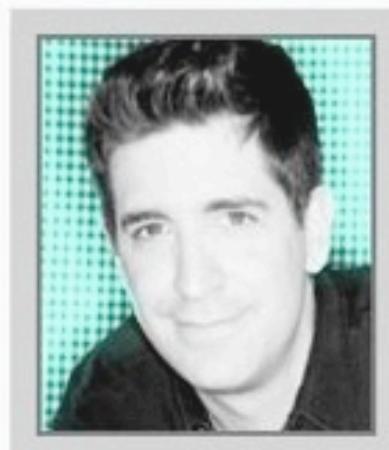

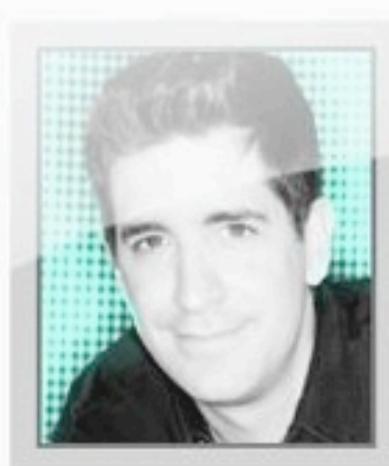

IMAGE MASKS

```
img {  
display: block;  
float: left;  
margin-right: 20px;  
border: 10px solid #ccc;  
padding: 2px;  
background-color: #666;  
-webkit-mask-box-image: url(mask.png);  
}
```

LESSONS LEARNED

- When creating a mask, every part of the image that is transparent becomes the mask or the part that hides a portion of the background image.
- Approach is somewhat hard to understand, since typically, alpha transparency is, well, transparent.
- The masks scale to the complete width of image, including borders.
- The background shows through, including background images.
- Might work best with areas of flat color behind the images

GRADIENTS

```
div.building {  
border: 1px solid #666;  
float: left;  
width: 300px;  
height: 300px;  
margin: 20px;  
background-image:  
  -webkit-gradient(radial,center center,900,center  
bottom,0,from(#0cf),to(white));  
background-image:  
  -moz-radial-gradient(center,900px,center  
bottom,0,from(#0cf),to(white));  
background-repeat: no-repeat;  
}
```

SAFARI GRADIENTS

**background-image:
-webkit-gradient();**

Recommend using background-image over background shorthand.

SAFARI GRADIENTS

**background-image:
-webkit-gradient(radial);**

Other value it accepts is linear.

SAFARI GRADIENTS

```
background-image:  
-webkit-gradient(radial,center center,900);
```

Set the starting position of gradient.

SAFARI GRADIENTS

```
background-image:  
  -webkit-gradient(radial,center center,900,center  
bottom,0);
```

Set the end position of gradient.

SAFARI GRADIENTS

```
background-image:  
  -webkit-gradient(radial,center center,900,center  
bottom,0,from(#0cf),to(white));
```

Set the starting and stopping colors.

LESSONS LEARNED

- Gradients in Safari can be applied to not just background images of block-level elements, but also:
 - list bullets, generated content, and border-images!
- Unit values aren't accepted (px, em, etc.) It's assumed to be pixels.
- Don't use background-position shorthand values.
- Use a background-image with a gradient for “older” browsers.

FIREFOX GRADIENTS

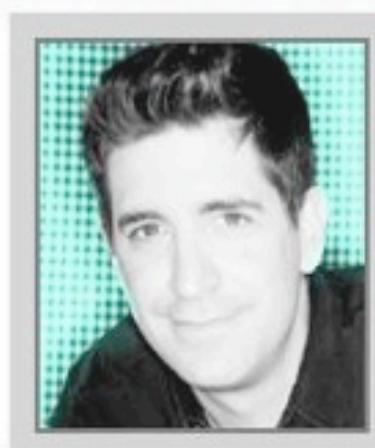

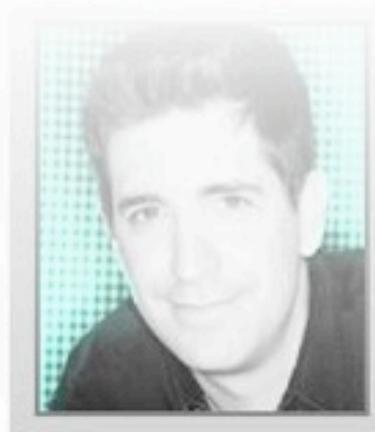

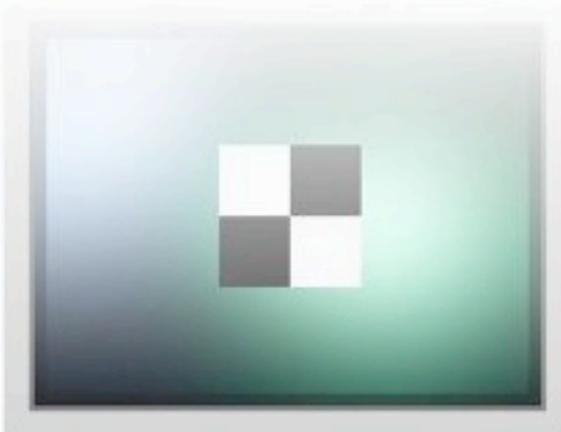

- Whereas Safari sets the type of gradient within its own proprietary property, Firefox has properties for both types of gradients: -moz-radial-gradient() and -moz-radiallinear().
- Unlike the Safari gradient, you can use background-position shorthand values *and* unit values when setting the starting and stopping points of gradients.
- Firefox's implementation of CSS gradients concerns transparency.

FIREFOX GRADIENTS

```
background-image: -moz-linear-gradient(left top, left bottom,  
from(rgba(153,51,0,.3)), to(#6b3703), color-stop(0.5, #903000));
```

GRADIENT MASKS

GRADIENT MASKS

```
img {  
display: block;  
float: left;  
margin-right:20px;  
border: 10px solid #ccc;  
padding: 2px;  
background-color: #666;  
-webkit-mask-box-image:  
-webkit-gradient(linear, left bottom, left top,  
from(rgba(0,0,0,1)), to(rgba(0,0,0,0)));  
}
```

Only works in Safari.

Zod URL - Kneel before shorter links

ZOD URL

KNEEL BEFORE SHORTER LINKS

SHORTENING LINKS

URL shortening is a technique on the World Wide Web where ZodURL makes a web page available under a very short URL in addition to the original address. This technique makes it possible to avoid URL distortion when emailing, tweeting, or even reading them over quaint telephony.

Example of transparent gradients, border image, PNG8, text-shadow, box-shadow

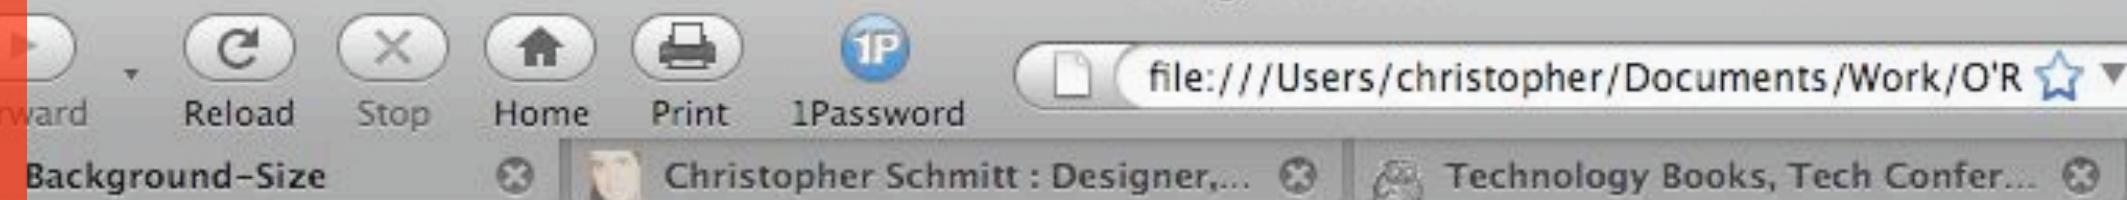

TRANSFORM & ANIMATE

TRANSFORM

Background-Size

TRANSFORM

```
img+img {  
  transform: rotate(270deg);  
  -webkit-transform: rotate(270deg);  
  -moz-transform: rotate(270deg);  
  filter: progid:DXImageTransform.Microsoft.BasicImage(rotation=3);  
}
```

TRANSFORM IE CONVERSION

Degree Rotation	BasicImage filter value
0	0
90	1
180	2
270	3

ANIMATING LINKS

```
#navsite a {  
  -webkit-transition-timing-function: linear;  
  -webkit-transition-duration: .66s;  
  -webkit-transition-property: background-color;  
}
```

Style rollover links normally.

LESSONS LEARNED

- **The transitioning-timing-function function states the type of animation the effect is going to take.**
- **In this example, the value is set to linear, which means each frame of the animation length takes the same amount of time.**
- **Other values for transitioning-timing-function include ease, ease-in, ease-out, and cubic-bezier (x1, y1, x2, y2).**

cubic-bezier(x1, y1, x2, y2)

- The first two values of cubic-bezier represent the transition on a curve, as shown in the figure.
- Values for y1 and y2 represent the start and end of the transition and are always equal to the values of 0.0 and 1.0, respectively.
- The speed with which the transition takes hold is represented by the values x1 and x2. The greater the value for x1 and x2, the slower the transition occurs.

CUBIC BEZIER CURVE

- A value of ease-in starts the transition at a slow speed and then speeds up. This value is equivalent to cubic-bezier(0.42, 0, 1.0, 1).
- The ease-out value starts the transition at a fast speed and then slows down. This value is equivalent to cubic-bezier(0.42, 0, 1.0, 1).
- The ease value is equivalent to cubic-bezier(0.25, 0.1, 0.25, 1.0).

DURATION & DELAY

- The ***transition-duration*** property's default value is **0**.
- Any negative value is treated as though it's zero.
- Units the value may take include, but are not limited to, "s" for seconds and "ms" for milliseconds.
- The ***transition-delay*** property sets the amount of time before a transition starts.

TRANSITION PROPERTY

- The ***transition-property*** property defines which CSS visual property the transition is applied to.
- In the animated link example, the transition is applied to the background color.

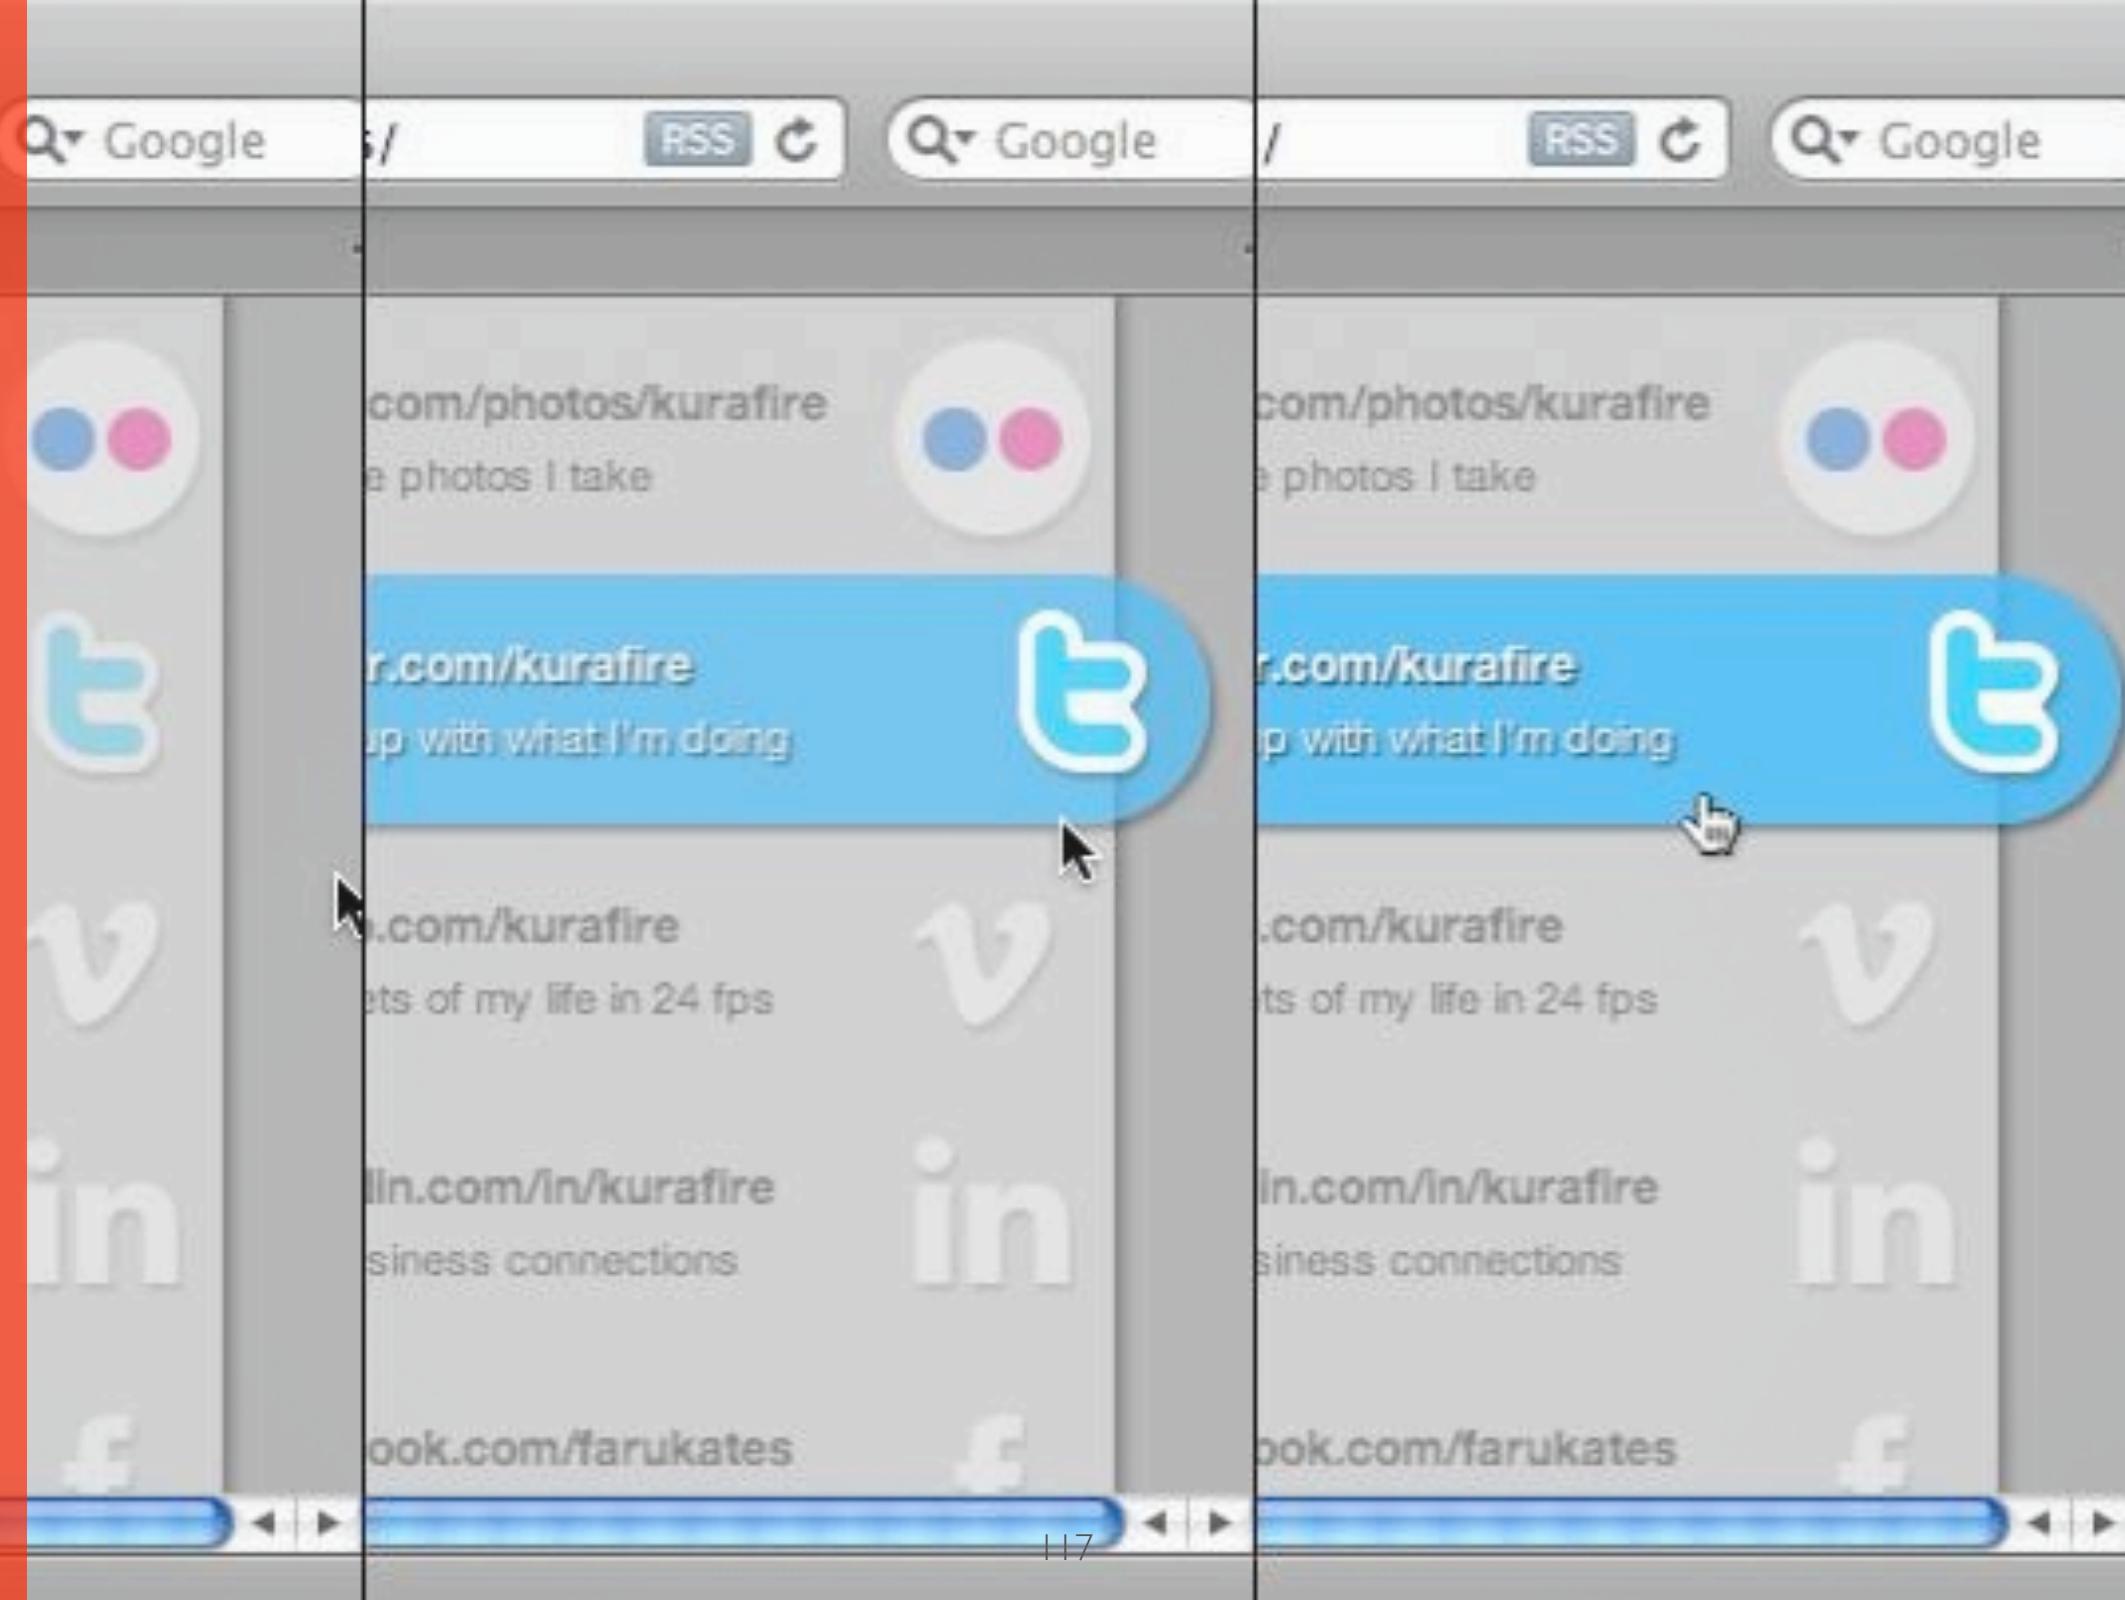

SHORTHAND PROPERTY

- You can write the properties of the transition effect in one value for the transition property:

```
#navsite a {  
  -webkit-transition: background-color .66s linear;  
}
```

COMPLEX ANIMATED LINKS

- Web designer Faruk Ateş's personal site (see <http://farukat.es/>) uses the *transition* property to change the color of the element.
- As well as the color, width, box shadow, text shadow, and opacity.

COMPLEX ANIMATED LINKS

```
#web20 li a {  
    text-shadow: rgba(0,0,0,0) 1px 1px 2px;  
    -moz-box-shadow: rgba(0,0,0,0) 2px 2px 2px;  
    -webkit-box-shadow: rgba(0,0,0,0) 2px 2px 2px;  
    -moz-border-radius-topright: 31px;  
    -moz-border-radius-bottomright: 31px;  
    -webkit-border-top-right-radius: 31px;  
    -webkit-border-bottom-right-radius: 31px;  
-webkit-transition: background-color .25s ease,  
color .5s ease,  
width .2s ease-out,  
-webkit-box-shadow .25s ease,  
text-shadow .2s ease,  
opacity .2s ease;  
}
```

ANIMATING ELEMENTS

The image displays two side-by-side screenshots of a web browser window, likely Safari, showing a CSS-based feather animation. Both screenshots have a title bar labeled "CSS Cookbook".

Screenshot 1 (Left):

- The title bar says "CSS Cookbook".
- The address bar shows "file:///Users/christopher/Pictures/cloud%20anim".
- The tabs include "Bookmarketlets", "In Control Conference", "CSS Prism", "ChoiceTweets", "Twitshirt This!", "CSS Cookbook" (active), "Christopher Schmitt : Design...", and "Technology Books, Tech Co...".
- The main content area features a large, detailed illustration of a brown pelican in flight against a blue sky with white clouds. Below the bird, the text "Birds of a Feather" is displayed in a large, bold, black font. The word "of a" is in a smaller, lighter gray font.
- Below the title, there is a list of three URLs:

- <http://www.flickr.com/photos/mikebaird/665300179/>
- <http://www.flickr.com/photos/13521837@N00/2256217996/>
- <http://www.flickr.com/photos/vinayshivakumar/3194015535/>

Screenshot 2 (Right):

- The title bar says "CSS Cookbook".
- The address bar shows "file:///Users/christopher/Pictures/cloud%20anim".
- The tabs are identical to the first screenshot.
- The main content area features the same large illustration of a brown pelican in flight against a blue sky with white clouds. Below the bird, the text "Birds of a Feather" is displayed in a large, bold, black font. The word "of a" is in a smaller, lighter gray font.
- Below the title, there is a list of three URLs:

- <http://www.flickr.com/photos/mikebaird/665300179/>
- <http://www.flickr.com/photos/13521837@N00/2256217996/>
- <http://www.flickr.com/photos/vinayshivakumar/3194015535/>

A small amount of text is visible at the bottom right of the second screenshot, which appears to be cut off:

Li European lingas es membres del san familie. Lor separat existente es un myth. Por scientie, musica, sport etc., li tot Europa usa li san vocabularium. Li lingus differe solmente in li grammatica, li pronunciation e li plus commun vocabuloes. Omnicos directe si desirabilità; de un nov lingua franca: on

ANIMATING ELEMENTS

```
<body>  
<div id="clouds1"></div>  
[...]  
</body>
```

ANIMATING ELEMENTS

```
#cloudsI {  
    width: 627px;  
    height: 410px;  
    position: absolute;  
    right: -300px;  
    top: 0;  
    background-image: url(clouds.png);  
}
```

ANIMATING ELEMENTS

```
@-webkit-keyframes "clouds" {
  from {
    right: 0px;
  }
  to {
    right: 100px;
  }
}
```

ANIMATING ELEMENTS

```
#clouds1 {  
width: 627px;  
height: 410px;  
position: absolute;  
right: -300px;  
top: 0;  
background-image: url(clouds.png);  
-webkit-transform: translate(300px, 0px);  
-webkit-animation-name: "clouds";  
-webkit-animation-duration: 10s;  
-webkit-animation-iteration-count: 10;  
-webkit-animation-direction: alternate;  
}
```

ANIMATING ELEMENTS

- Animations can take on more than one property (think offset properties and even opacity for some interesting effects).
- The ***animation-transform*** property is used to associate which keyframe rule is used (“clouds”).
- The ***animation-duration*** is set for how long the effect should occur. (Negative values are treated as zero.)
- The ***animation-iteration-count*** tells how many times it should happen. For constant looping, use value of “infinite”.
- Use ***animation-direction*** property set to normal loops animation, while “alternate” creates a more seamless presentation (back and forth).
